BACKWARDS AND FORWARDS

Here's your chance to get creative, be a detective of the past and a designer of the future.

How do you think this object might look in the future? Draw it in the future box. Perhaps it will be entirely different. Draw how you imagine it could be.

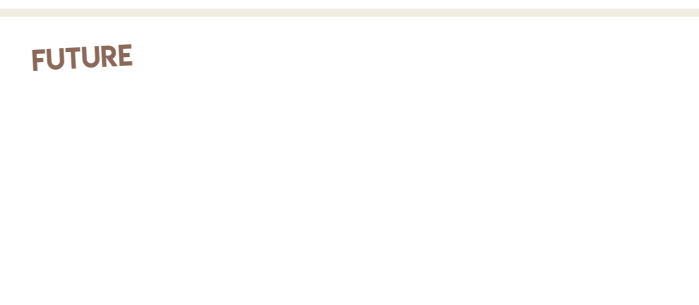

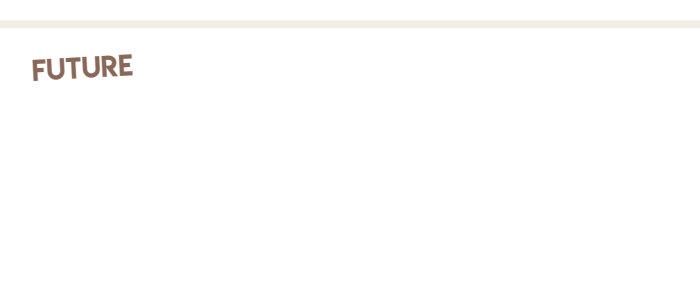

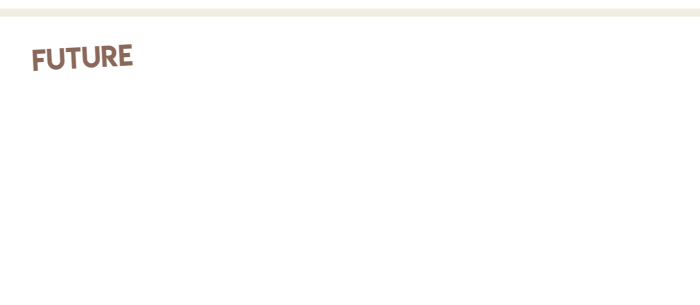

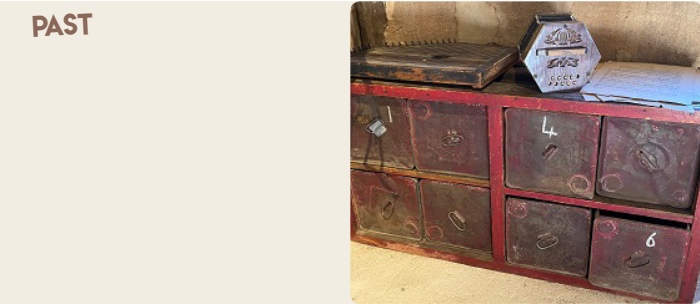

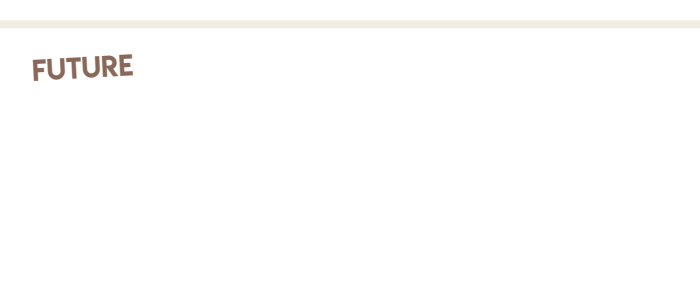

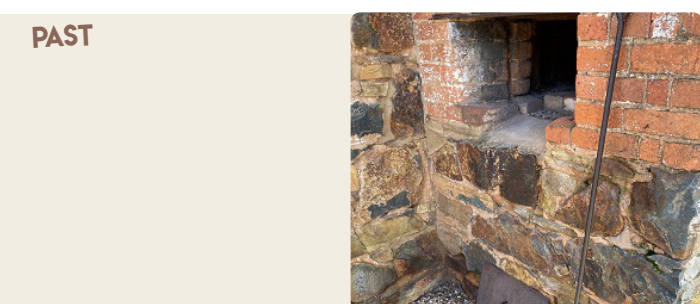

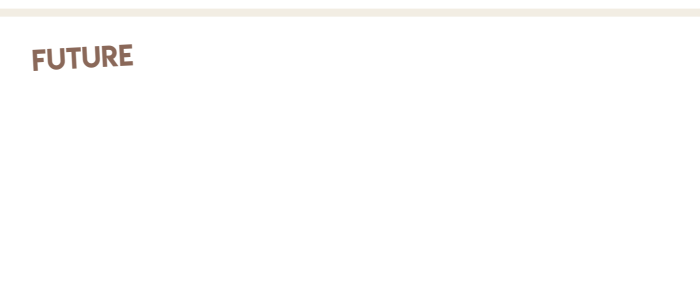

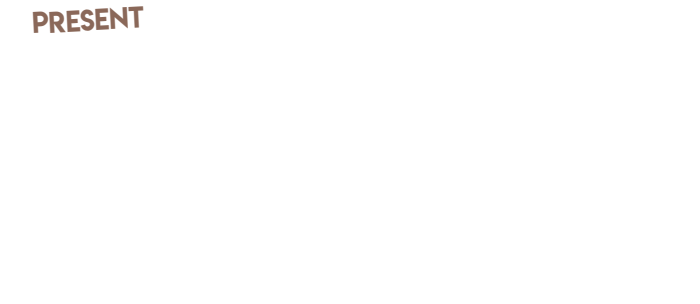

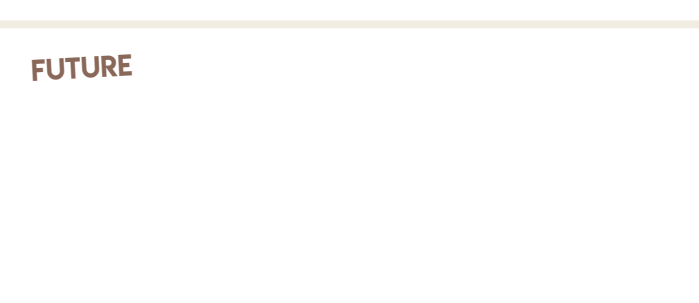

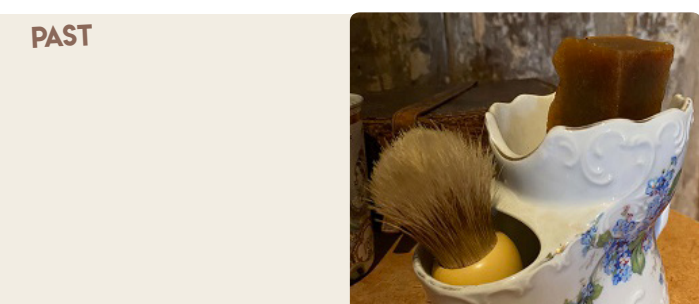

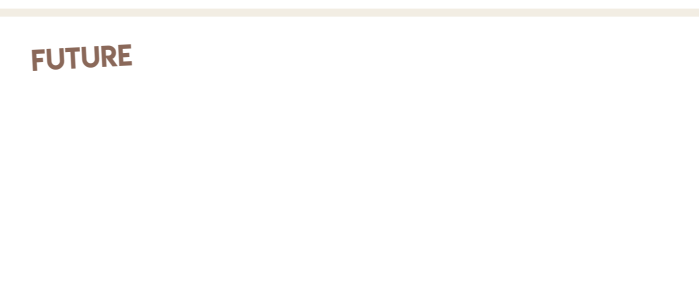

A vintage Radiola Model 1500 radio. The front panel is made of wood-grain material and is housed in a black Bakelite cabinet. The dial features several frequency scales: a top scale for 1000 to 1500 Kilocycles, a middle scale for 100 to 150 Mc, and a bottom scale for 100 to 150 Mc. The Radiola logo is prominently displayed in the center. The radio has three large knobs at the bottom and a small speaker grille on the left side.

FUTURE

A green metal cabinet with a decorative lattice door, containing white bowls and a dish of food.
