

NCA MAJOR WORKS APPROVAL

Planning Report and Application Information Checklist addressing proposed development at;

12 Somers Crescent, Forrest.

The ageing in place agenda

TT Architecture has been involved in residential design for nearly 30 years and have come across many clients who love where they live and would like to stay in that area, preferably on their own blocks. They realise they have a block that is zoned for development of some kind but are not sure how this might all come together. These thoughts are often part of a desire to downsize from a large family home that is no longer appropriate to their future intended lifestyle.

These house owners have no real desire to move to an apartment block or a unit as they would like to retain a small garden at least. They would prefer to 'age in place' in a suitably designed dwelling with the majority of their living areas being located on the ground floor.

Housing choices

This design proposal focuses on the lack of housing choices for those wishing to 'age in place' in the Deakin Forrest area. There are many others in this community, ostensibly marooned on large blocks. They would love to downsize, not to an apartment block but rather stay in location with a smaller house and garden and better utilise their often-larger blocks of land. Canberra is one of the least dense cities in the world. The notion that everyone wants a quarter acre block is considered outdated by many.

The NCA residential area

12 Somers Crescent is located in the relatively small and discrete National Capital residential area and is particularly appropriate for this redevelopment exercise given the current planning rules.

The Deakin/Forrest Residential Precinct is located close to major employment areas, the city, and major transport routes. Current approaches to urban planning suggest that such locations should be utilised for higher density development to help reduce urban footprints, improve city sustainability, and make better use of infrastructure. More compact cities can assist in containing the extent of infrastructure we build and maximise the number of people it serves, making it more cost and energy efficient.

The following points summarise characteristics of the area:

- residential blocks are typically large, ranging in size from 1050m² to 3832m² (average size of 1662 m²) there is diversity in architectural style, dwelling size, and residential type (for example, multiple dwelling development versus single residential dwellings)
- the majority of blocks have a single dwelling, with heights varying between single and two storeys

- there is no unifying architectural style or building materials, even amongst older dwellings (likely resulting from development of the area over several decades commencing in the 1950s)
- many of the older dwellings are quite modest, in a garden setting with multiple canopy trees and extensive soft landscaping (often exotic species)
- redeveloped blocks have greater site coverage and levels of hardscape.

The Plan does not currently prohibit the redevelopment of blocks for higher density residential development, such as duplexes and small townhouse complexes. It is not proposed to change this approach, instead focussing on improvements to the way in which new dwellings are inserted into the suburb without adversely impacting on key characteristics of the neighbourhood. This new imperative is outlined in the NCA's new landscape and sustainability guidelines July 2018 and which this development proposal directly addresses.

LANDSCAPE AND SUSTAINABILITY GUIDELINES
Deakin/Forrest Residential Area Precinct Code

July 2018

2018 survey of block development in the NCA residential area.

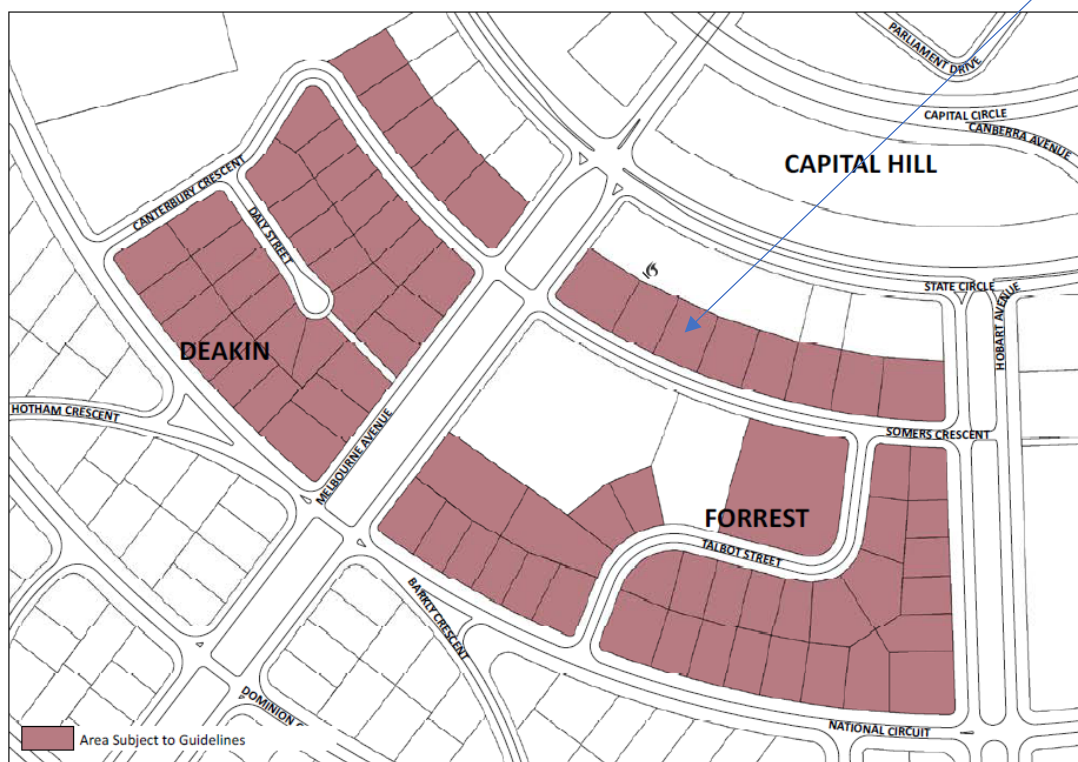

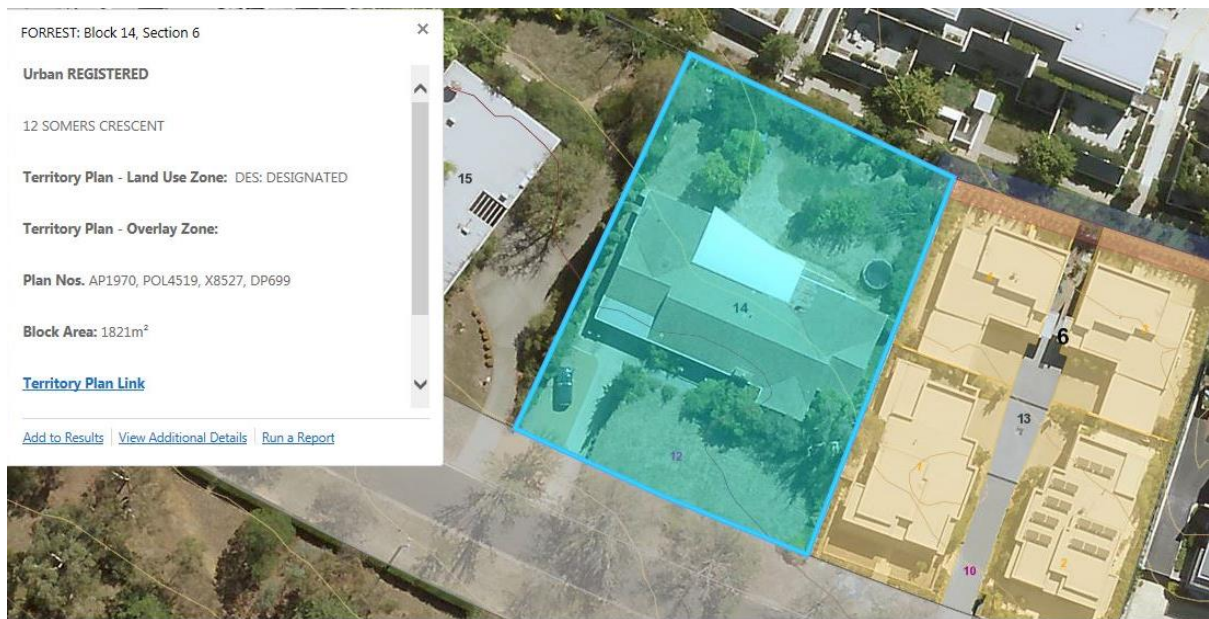

Figure 1: Area subject to Deakin/Forrest Residential Area Precinct Code - Landscape and Sustainability Guidelines

Site context

The site is adjacent to a substantial development to its north on State Circle. There is also a high density two storey apartment complex to the east of the site. The salient features of the site context are indicated in the diagram below. Refer to drawing DA02 for further site context images.

Proposed new development as viewed from Somers Crescent

Mandatory requirements	Response
A Locality Plan which identifies the site and its context.	See attached drawings above and refer to drawing DA02 for further site context images
A written description of the works proposed.	This project involves the demolition of an existing dwelling in relatively poor condition to be replaced with three individual residences surrounded by landscape and predominantly North facing single storey designs with 2 storey elements.
Plans or drawings describing the works with drawing numbers.	See appendix No 1
Authorisation from the landowner/lessee or land custodian to lodge the application on their behalf.	See appendix No 2 
1 Planning report Which addresses the relevant design and planning matters in accordance with the provisions of the National Capital Plan.	Response
	This tabular section is part of the DA application includes and constitutes the planning report.
2 Schedule of Proposed Works Which gives details of the works proposed including extent of earthworks, off-site work requirements and works associated with service connections. It should also describe the quantitative characteristics of the proposed development such as:	
Gross floor area	Site area: 1821m ² Maximum allowable GFA: 1769.47 x 0.4 = 728.4m ² Driveway area: 253.41m ² Total built area: 834.96m ² Total GFA (carparking removed): 709.32m ² Planting area: 725m ² = 41% (min 40%)

Site coverage	485.4 m ² of 1821 m ² = 26.7%																																																																																																																																																																																																																																														
Building height	Maximum height allowed 8 m HEIGHT AND SETBACK CALCULATIONS BUILDING HEIGHT RELATIVE TO NGL (REFER DA10) RES 1 = 6070MM RES 2 = 5906MM RES 3 = 5264MM 2 STOREY SIDE SETBACK CALCULATIONS; FRONT BOUNDARY 38.376M 38.376 - 23M = 15.376M 15.376 / 3 = 5.125 5.125 x 0.5 = 2.563M 6070/2 = 3035 3035 + 2563 = 5598MM																																																																																																																																																																																																																																														
Building setbacks from property line	Additional side setback is 0.5m for every 3m of Effective frontage over 23m 38.376m - 23= 15.376 / 3 =5.125 x 0.5 = 2.563m Additional setback 2.563m Upper story side setback is (6070 / 2) + 2.563m = 5598m refer to drawings DA01 (Appendix 1)																																																																																																																																																																																																																																														
External materials and colours	Refer to notes on drawing DA05 and rendered perspectives. Appendix 1																																																																																																																																																																																																																																														
3 Quantity Surveyor's Certificate of Costs for all proposals over \$2 million	Response																																																																																																																																																																																																																																														
	Comment from builder Dan Fitzpatrick of Architekt Grune Houser.re pricing (12-12-19) Our price estimate for your 3 new residences in total will be \$2,798,363 including GST The price with all the internal works/fit out removed is \$1,774,941.00 including GST (ie basis of DA fee for NCA) This figure is a quotation. Further information on costing available on request.																																																																																																																																																																																																																																														
	<div><div><p>Forward Development</p><p>Thank you for the opportunity to provide an estimate on the proposed development at Somers Crescent, Forrest. At this stage it is worth noting that we provide this quote as closely as possible to the plans and we feel there is need for further consultation in order to cover all aspects of the build. There are a number of areas that prices have been calculated as best as possible keeping in mind many questions are yet to be made. Also it is worth noting many of the services such as ACTEW fees are Provisional Costs and are taken as an estimate based on previous works of this scale.</p><p>Moving forward we would look to undertake these works on a project management basis to ensure fairness towards all parties. It is my belief that the project can be delivered at a cheaper price under this structure. Also this price revision has been carried out as per scope and in keeping with other tendered prices to ensure we are all quoting the same items. I believe the project can be delivered to a standard suitable for the location for perhaps 5-10% less than the price given that in mind the new price including site works and landscaping is \$2 798 363. This price includes GST.</p><p>The overheads, running cost, management fee and profit for Architekt Homes on this job are included in this cost.</p><p>Within our fee we are responsible for the total of all construction work. That is, we will plan, coordinate and supervise the complete construction of your home, from pre-construction such as appointment of certification through to practical completion. We stand by our work as being of the highest quality and workmanship across all trades and throughout the entire project. We will be in constant communication with you to ensure you are completely happy with not only the progress of the building works, but also the completed project. We will be on-site, not only to carry out the majority of works, but to ensure that all work undertaken is done so in a professional and proficient manner. We are a hands on building team, with myself and a small team carrying out the majority of time on our jobs, as well as managing the project. We are proud of our combined industry experience of over 30 years building homes of high quality.</p><p>We hope this proposal meets with your approval and we are only too happy to provide any additional information or consultation as required.</p><p>It is expected that the works will take 18 - 24 weeks to bring to completion, starting from the time of the site being ready for construction.</p><p>The following names are those of clients we have carried out work for in the past, please feel free to call them as a reference of our workmanship and professionalism. We are more than happy to provide more names and organise inspections of past properties if needed.</p><p>Michael Snape, Anker Steady House - 0418 729 662 Julie Butler, Hackett Industrial House - 0424 258 193 Cate Perry, Banks of House - 0429 917 267 Stephanie Van Gerven, Hackett Mill Century Modern House - 0459 822 387</p><p>Kind Regards, Daniel Fitzpatrick</p></div><div><p>Full Estimate Summary</p><table><tr><th>Trade No.</th><th>Trade Description</th><th>Trade Qty</th><th>Cost/102</th><th>Sub Total</th><th>Mark Up %</th><th>Trade Total</th></tr><tr><td>1</td><td>Preconstruction</td><td>1.00</td><td>41.60</td><td>41.60</td><td></td><td>41.60</td></tr><tr><td>2</td><td>Excavation</td><td>1.18</td><td>54.16</td><td>63.91</td><td></td><td>63.91</td></tr><tr><td>3</td><td>Site Work and Earth Retention</td><td>1.22</td><td>58.16</td><td>70.96</td><td></td><td>70.96</td></tr><tr><td>4</td><td>Services and Drainage</td><td>4.80</td><td>204.96</td><td>983.90</td><td></td><td>983.90</td></tr><tr><td>5</td><td>Foundation - <p>12 A Consultation Report outlining the any pre-consultation conducted by the proponent and how the matters raised during consultation has been addressed. The NCA may be required to conduct further consultation on the application</p>	<p>Response</p>
	<p>We understand following discussions with the NCA that the main objective of the Consultation Report is to ensure applicants have attended appropriate pre-application meetings to discuss the design at various stages.</p> <p>Three meetings were held where the design proposal was discussed.</p> <ul style="list-style-type: none"> • 23-1-18 • 19-9-18 • 11-12-19 <p>The following correspondence was received 14-11-2018 suggesting that the scheme is not inconsistent with the NCA guidelines and to proceed with a DA application subject to minor comments made at the meeting ;</p> <div data-bbox="616 1361 1362 1906" style="border: 1px solid #ccc; padding: 10px; margin: 10px 0;"> <p>From: Carly Porreca <Carly.Porreca@nca.gov.au> Sent: Wednesday, 14 November 2018 10:24 AM To: Tony Trobe <tonytrobe@ttarchitecture.com.au> Cc: Ilse Wurst <Ilse.Wurst@nca.gov.au> Subject: Preliminary proposals - 12 Somers Cres, Forrest and 10 Canterbury Cres, Deakin - NCA advice [SEC=UNOFFICIAL]</p> <p>Security: Unofficial</p> <p>Hi Tony,</p> <p>I believe you have spoken to Ilse recently regarding these proposals. The Board do not need to review these in detail. We are to progress like any other works approval application.</p> <p>We have reviewed the plans, and can provide the following comments in terms of inconsistency with the NCP and Guidelines.</p> <p><u>12 Somers Crescent, Forrest</u></p> <ul style="list-style-type: none"> - There are no large canopy trees proposed. Some of the smaller trees should be replaced by a larger tree species (at least one large tree per rear yard and one to the front is suggested). <p>This proposal is not in consistent with the NCP and guidelines (if trees species are changed) and you could progress documentation in order to lodge a works approval application.</p> </div> <p>The current scheme is largely in line with the design presented earlier.</p>

Specific responses to the sustainability and landscape guidelines 2018

Landscape

Not less than 40% of total site area should be for soft planting area.

Generous areas of soft planting should be provided to surround or encircle each dwelling. The NCA may consider partial encircling of a dwelling where it can be demonstrated that the total site area for soft planting on the block.

A composition of soft landscaping should be provided between the building line and the front property boundary.

A combination of new and existing trees is capable of providing at least 15% canopy coverage of a site when trees are mature.

Refer to notes on the Landscape Plan Appendix 6

Soft landscape treatment 725m²
41% of total site area (40% required)

Additionally, soft planting encloses all the living areas. This has been discussed and agreed in principle with the planning team at the NCA during multiple pre-application meeting.

Refer to the landscape plan (appendix 6) for the design of the landscape between the building line in front property boundary.

Refer to the landscape plan which addresses this issue in detail. (appendix 6)

Tree cover at maturity 575m²
31% of total site area (15% required)

Private open space

Each dwelling should have an area of principal primary open space located at ground floor level, with a minimum dimension of four metres and minimum area of 20m². Reasonable privacy of principal private open space of each dwelling should be demonstrated.

Private open spaces should be oriented predominantly to the north, east or west.

Private open space should provide sufficient space for deep rooted planting,

This condition is met and exceeded, refer to landscape plan appendix 6 and architectural drawings appendix 1. Reasonable privacy is established by the nature of the planning configuration there is no overlooking between dwellings. The north orientated courtyard spaces are completely self-contained and directly connected with the primary living areas.

Refer to Appendix 1 Architects drawings

Sufficient space for deep rooted planting is provided by virtue of the dimensions of the private open spaces. See landscape plan Appendix 6

<p>particularly trees with deep root systems. A minimum of one canopy tree (capable of achieving a crown diameter of a minimum of eight metres when mature) should be provided in the private open space of each dwelling.</p>	<p>All soft landscape areas are deep root zones. There are no underground basements. At least 1 minimum canopy tree of 8m diameter has been provided except the northern residence due to existing power lines.</p>
<p>Vehicle access and car parking</p> <p>No increase in the number or width of verge crossings is generally permitted.</p> <p>Driveways should integrate with front garden planting to reduce the visibility of the driveway from the street.</p> <p>Driveways should be a single-vehicle width (<3.6m) between the front boundary and building line and have a uniform surface of subdued charcoal or earthen tones. Gravel, brick, clay or concrete pavers or bitumen are preferred surface finishes.</p> <p>Verge crossings should have a bitumen surface. Where existing verge crossings are surfaced in a material other than bitumen, consideration should be given to replacement.</p> <p>A minimum of two off-street car parking spaces should be provided for all new dwellings.</p> <p>To avoid parking dominating the streetscape, garages and carports should be located behind the main building façade. Other elements of the dwelling design should dominate the streetscape.</p>	<p>The existing verge crossing is retained</p> <p>This condition is met. Refer landscape plan (Appendix 6). Existing verge crossing and location and configuration to remain</p> <div data-bbox="609 954 719 1032">  </div> <p>VEHICLE PAVING TYPE 1 Material: Asphalt with brick trim Charcoal coloured</p> <p>Refer to landscape plan for proposed finishes</p> <p>Refer to architectural drawings (Appendix 1) Existing off-street parking conditions remain. There is substantial off-street parking.</p> <p>Refer to architectural drawings (Appendix 1) Garages are located behind the main building façade and do not dominate the streetscape.</p>
<p>Hedges and fences.</p> <p>The planting of hedges along front boundaries and alongside boundaries forward</p>	<p>Refer landscape plan (Appendix 6)</p>

<p>of the building line, to separate the public and private domains, and which 'frame' views to dwellings and front gardens, are encouraged.</p> <p>Replacement or new hedge species should be evergreen and of appropriate scale and shape to form a border of typically not more than 1.2 metres in height.</p> <p>Fences and gates between buildings and side boundaries should be: set at least 0.6 metres behind the building line a maximum of 1.8 metres in height above natural ground level timber paling, timber lattice, brush, open mesh or metal railing.</p> <p>Side and rear boundary fences and gates should: not extend forward of the building line be a maximum of 1.8 metres above ground level be timber paling, timber lattice, brush or open mesh metal railing.</p>	<p>Refer to landscape plan (Appendix 6)</p> <p>Refer to architectural drawings (Appendix 1)</p> <p>Refer to architectural drawings (Appendix 1)</p>
<p>Sustainability</p> <p>The design of buildings should demonstrate a high standard of sustainable design. Design responses could include: Living areas oriented to the north</p> <p>Design of eaves and awnings to provide shade for window during summer</p> <p>Selection of building materials and colours which absorb less heat in summer</p> <p>Insulation of walls, ceilings, floors and roof spaces</p>	<p>The development has been configured with sustainability issues at the forefront of the design decisions. The dwellings have been designed with a long east-west axis such that all living areas are oriented to the north</p> <p>Eaves provide shade in summer.</p> <p>Generally light-coloured materials are selected. See architectural renders. (Appendix 1)</p> <p>Installation will be maximised and is included in the inclusions list schedule for potential purchasers. R5 ceilings plus sarking, R2 to walls plus sarking.</p>

<p>Use of smart glass or other technologies on north and west elevations</p> <p>Installation of photovoltaics on buildings to generate electricity.</p> <p>Proposals should demonstrate overshadowing or impacts to privacy of neighbouring properties is minimised, including to both dwellings and open space.</p> <p>New development should be located and oriented to maximise visual privacy between buildings on site and for neighbouring properties.</p> <p>New development should ensure that building separation does not impact on the solar access of neighbouring properties</p>	<p>All windows will be double glazed and Low-E glass used where appropriate. To be determined as part of the overall energy rating six stars minimum.</p> <p>This will depend on client selection but be encouraged.</p> <p>There are no overshadowing impacts on north east or west neighbouring properties. There are no dwellings to the south.</p> <p>There are no visual amenity issues between buildings on neighbouring lots. The dwellings will be virtually invisible from the outside With some of the existing current 'weed' species removed at the rear there is some potential for overlooking from the State Circle dwellings into the garden of the rearmost unit which is addressed to the landscape plan.</p> <p>The new development has no impact on the solar access of neighbouring properties.</p>
